

Portable Electrical Stimulators

High Voltage Pulsed Current (HVPC)
for wound healing, increased blood
flow and pain reduction.

GeniStim 330™ Galvanic Stimulator

The GeniStim 330 is an easy-to-use high voltage pulsed current (HVPC) stimulator suited to a range of physiological applications. It supplies a galvanic stimulation current for wound healing, increased blood circulation and pain reduction. A convenient timer permits automatic shut-off at the end of the therapy session.

It has two active leads for treating two locations at the same time. Controls are housed in a transparent cover to prevent inadvertent altering of the settings during treatment.

Specifications:

Output Channel: Two active outputs, one dispersive return

Cycle: Continuous or alternating

On Time: 7 seconds fixed in alternating mode, or continuous

Wave Form: Pulsed galvanic monophasic exponential spikes, delivered in pairs with a fixed interpulse interval of 100 microseconds

Treatment Timer: 60 minutes, 15 on / 45 off or continuous

Frequency: 1 - 100 Hz, selectable, with digital display

Output Voltage: 0 - 330 V, adjustable

Power Source: Two 9-volt batteries or AC adapter 120 VAC

Polarity: Positive or negative

Time Display: Records total usage time in minutes

INCLUDED WITH THE GeniStim

- HVPC stimulator
- Lead wire
- 3 alligator clips
- 2 splitter cables
- Electrode kit with two active and one dispersive electrodes
- Batteries
- AC adapter

PulseStim 240™ Galvanic Stimulator

The PulseStim 240 is a light-duty single-channel stimulator for wound healing and for home treatment of pain and poor blood circulation. Its two active output leads can be used for continuous stimulation, or alternating between the two leads.

Specifications

Output Channel: Two active outputs, one dispersive return

Cycle: Continuous or alternating

Wave Form: Twin peak, monophasic

Polarity: Positive or negative

Frequency: 2 – 100 Hz, adjustable

Output Voltage: 0 – 240 volts (500 Ohm load) 0 to 350 volts (open circuit)

Pulse Duration: 5 microseconds

IntraPulse Interval: 100 microseconds

Power Source: 9 volt alkaline or rechargeable battery, or AC adapter 120 VAC

A sliding cover provides access to the controls and to the battery.

INCLUDED WITH THE PulseStim 240

- HVPC stimulator
- Lead wire
- 3 alligator clips
- 2 splitter cables
- Electrode kit with two active and one dispersive electrodes
- Battery
- AC adapter
- Instruction sheet
- Carry case
